GB DISTRIBUTION

Ozone Mini O3

Eradicate Odours

No refilling
2-year
limited warranty

For a complete peace of mind, the Ozone Mini O3 Plug in Unit will eradicate the strongest odours leaving you with a stress-free life. GB Distribution suggest using this amazing product as a secondary barrier outside of your growing area. The Mini O3 is to be left on outside the grow space i.e., in the hallway or in the same room if using a grow tent. GB Distribution recommends using Mini O3 from start to finish of all grow cycles. Just simply plug into the wall and it will do the rest.

Specific Details

The Ozone Plug in unit is our smallest, portable Ozone generator, it is designed to be used as an alternative to fragranced plug-in products, rather than masking an odour use the Ozone Plug In to remove bad odours. Our unit requires no cartridges, so it is very cost effective to use. The product has a 2-year limited manufacturer's warranty. As the unit has a pre-programmed timer, the machine can be used when the area is occupied. This generator produces 7mg of Ozone per hour, likely the oldest and traditionally the most common use of ozone in the Hydroponic growing industry, is odour control. Ozone is extremely effective at reducing organic odours and is used in many applications for odour reduction/elimination. During the growing, cultivation, and processing of your plant odours are created that can be potentially offensive. In applications where neighbours are close by or there may be aversions to any fugitive odours mini O3 is used as your last barrier.

ABOUT US:

Cronk Nutrients was established during the COVID-19 lockdown in 2020 with the goal of breaking into the horticulture industry. With a steadfast determination and additional time on hand, we embarked on a journey into the world of fertilizer. Although we had a passion for cultivating "tomatoes," it was only during the pandemic that we found the time to turn our dreams into reality. Our journey began with cultivating our own home grow, leveraging Instagram to connect with a community of like-minded enthusiasts, and eventually expanding our offerings to include grow lights and nutrients. Day and night, we worked tirelessly to create the high-quality products that now grace our store.

Successfully growing your own plants can be one of the most rewarding experiences of all, and the team at FloraFlex® strives to help our customers begin their own grow projects. Our hydroponic growing supplies have been carefully designed based on the inspiration and experience of growers in Southern California. After listening and learning from experts in the industry, we used their methods and traditions to form the foundation of our products, and we're happy to share them with you. Whether you're a new grower who just discovered your green thumb or you're an experienced gardener, we have all the hydroponic growing supplies you need to produce healthy, beautiful plants.
